SUMMARY

Results-driven Software Engineer currently working as a Sitecore Developer at Cognizant with experience in building and customizing enterprise web applications using ASP.NET MVC, C#, and Sitecore CMS. Skilled in developing reusable components, managing dynamic content, and improving application performance, with a solid understanding of software development and Agile practices. Currently upskilling in Machine Learning and Python, with hands-on experience in data analysis and basic ML models, aiming to transition into a Machine Learning Engineer role.

SKILLS

- Programming Languages:** C, Python
- Web Development:** HTML, CSS, Django
- Machine Learning & Data Science:** Machine Learning, Scikit-learn, Logistic Regression, NumPy, Pandas, Matplotlib, Seaborn
- Databases & Data Management:** DBMS, SQL, Apache Hive
- Big Data & Operating Systems:** Apache Hadoop, Linux
- Core Computer Science:** Data Structures and Algorithms, OOP

WORK EXPERIENCE

Programmer Analyst Trainee – Sitecore Developer

Cognizant, Bangalore | *March 2025 – Present*

- Developed and customized web pages and components using **Sitecore CMS, ASP.NET MVC, and C#**
- Created and maintained **reusable templates and components** to improve development efficiency
- Managed and updated **website content dynamically** through Sitecore CMS
- Worked on **backend logic and content rendering** to enhance application functionality
- Performed **bug fixing, debugging, and performance optimization** of web applications
- Collaborated with **cross-functional teams** including developers, testers, and business analysts
- Followed **Agile development practices**, participating in sprint planning, daily stand-ups, and code reviews
- Ensured **code quality and maintainability** through proper documentation and best practices
- Participated in deploying changes to higher environments.

Big Data Intern

Trendnologies, Chennai | *Jul 2023 – Aug 2023*

- Collaborated with the team and enhanced my skills in Apache Hadoop, Apache Hive, and Linux.
- Assisted in processing and analyzing large datasets using Hadoop Distributed File System (HDFS).
- Wrote Hive queries to extract, filter, and analyze data from structured datasets.
- Performed data loading and management tasks in HDFS to support data processing workflows.
- Worked in a Linux environment to execute Hadoop and Hive commands and manage files.
- Gained hands-on experience with Big Data concepts such as distributed storage and parallel processing.
- Participated in data cleaning, transformation, and validation activities to improve data quality.
- Supported team members in troubleshooting and optimizing Hive queries for better performance.

PROJECTS

- TODO List**

May 2024 - Jun 2024

 - The Todo List application is a web-based tool that allows users to create, manage, and organize their tasks.
 - Users can add new tasks, mark tasks as completed, edit existing tasks, and delete tasks.
 - Tools and Technologies: Django, Python, HTML, CSS.
- Diabetes Prediction**

Jan 2023 - Feb 2023

 - The model diagnostically predicts whether or not a patient has diabetes, based on certain diagnostic measurements included in the dataset.
 - packages and Libraries used: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn. Algorithm used is Logistic Regression and got an accuracy of 88.3%.

EDUCATION

Prathyusha Engineering College

Bachelor of Technology: Computer Science and Engineering (AI&DS) Nov 2021- April 2025

- CGPA: 8.13

Narayana Junior college

Intermediate: MPC Jun 2019 - Jun 2021

- 90%

Little Angels Public School

Secondary School: SSC Jun 2018 - May 2019

- CGPA: 9

ACHIEVEMENTS

- Python Programmer in Hacker rank: Gained 5 stars as Python Programmer in Hacker rank.
- Organized a symposium CONCORUS 2K22: Organized a symposium CONCORUS 2K22 at college level.
- Big Data Certification: Achieved certification in Big Data concepts.
